

SOUND DEPARTMENT

LEVEL 2 COVID-19 GUIDELINES

September 2021

Before you work:

- All crew MUST fill in a COVID-19 Health Declaration.
- If you have any COVID-19 symptoms, **do not come to work**. Please get tested.

Introduction to Department undertakings:

- Pre-Production tasks – remote (home)
- Pre-Production tasks – on site / in production office
- Management/coordination of Sound team
- Liaison with Post-Production and on-set departments in regards to technical requirements
- On-Set operation and troubleshooting as required

Department Bubbles

- Off Set Sound Department bubble (remote preparation).
- Off Set Sound Department bubble (production office)
- On Set Sound Department bubble (Unit/Tech base AND on Set)
- On Set Department HODs/Department Liaison bubble

PPE Requirements:

- At Delta Alert Level 2, face coverings are strongly recommended. And it would be expected that most productions will require them as part of their H&S plan. They are mandated by the MoH for public facing businesses and work.

Required Physical Distancing Requirements:

- The general rule of 2 metres applies at all times.
- If in a Controlled Environment, maintain at least 1 metre physical distancing between crew.
- No close contact less than 1m permitted unless essential AND you have been approved to be part of a Close Proximity Bubble.
- Creation of Close Proximity Bubbles must be done in consultation with Production, Cast, Health & Safety and other affected departments.
- *While every production is different, a Close Proximity Bubble should be the last resort for the Sound Department. And only after thorough discussion and approval by production and other affected departments/crew. Agreed safety precautions and PPE requirements must be adhered to at all times.*
- When interacting with any public or unknown persons, crew must maintain the minimum of 2 metres physical distancing at all times.

Contact Tracing:

- A Government Tracer App QR-code poster must be displayed at all work sites.
- All crew must sign-in when arriving and out when departing a work site.
- All entry and exit points should be controlled and monitored.
- All workers should keep a log of non-worksites locations (i.e. stores, etc.) and interactions (meeting suppliers, location owners, etc.) they have during working hours.
- All workers are recommended to keep note of their interactions outside of work hours (whilst on a job).
- All crew or approved site visitors must sign a COVID-19 Declaration before starting work or visiting a work site.

Department Specific Guidance

Sound crew should be aware of and trained to work under the specific alert level in operation prior to commencing work, including the correct use of PPE.

- Sound crew to work remotely when practicable.
- Sound / inter-departmental meetings to be remote as far as practicable.
- Physical production meetings to be carried out with physical distancing of at least 1 meter. If possible, particularly if in a confined space, a 10 person limit is recommended. Use of a face covering is strongly recommended.
- Sound crew to be split into smaller work groups/bubbles where possible (i.e. main unit vs. 2nd unit)
- Liaise with Production and Health & Safety in regards to contact tracing, PPE and hand/workspace/equipment sanitiser requirements for your department
- Consider specific production requirements in regards to equipment and crewing in order to ensure physical distancing and gear sanitation.
- The biggest impact to the sound department in achieving these safe work practices is the increased time needed to complete tasks.
- On set and off set bubbles to be maintained wherever practicable.

Personal Hygiene Requirements and Measures

- Any worker who feels unwell must not come to work, if unwell at work they must go home.
- If a worker displays any of the symptoms of COVID-19, please call Healthline immediately (0800 358 5453) or your doctor. Production and the Health & Safety Departments must also be notified. And all close contact workers to be identified.
- If a person or persons are confirmed or probable cases of COVID-19, site closure(s) should be considered. This decision should be made on the advice of a public health officials based on information on the extent of the exposure.
- At Delta Alert Level 2, face coverings are strongly recommended. And it would be expected that most productions will require them as part of their H&S plan. They are mandated by the MoH for public facing businesses and work.
- Please wash/sanitise your hands upon arrival at a work site.
- A strict personal hygiene & hand washing/sanitising regime must be observed in line with the ScreenSafe guidelines.
- In accordance with Ministry of Health guidelines, PPE (gloves and masks) should be available.
- If you choose to wear PPE, the type is up to you and should be based on the level of risk for your business or service, the working proximity, the physical work area, and the length of time people are together.
- Work should only be completed within one metre if it can't otherwise be achieved. The time spent in Close Proximity needs to be kept to a minimum. At all other times, a one meter distance should be maintained.

Work Space Hygiene

On and off set

- Hand sanitising stations should be readily available at production office/location/studio.
- PPE (gloves, masks, face shields) to be available.
- Equipment cleaning products should be readily available at production office/location/studio.
- Make sure sound crew are trained in appropriate equipment cleaning/sanitising, particularly for delicate electrical equipment.
- Personal kit/equipment/laptops to be used only by one person.
- Sound equipment to be sanitised at the end of each day. For larger productions, consider a designated sound crew member who is dedicated to maintaining high hygiene practices for all equipment.
- Regular aeration of any office space, open windows when possible. Avoid recycling air.
- Air conditioning should be run on fresh air setting, not on recirculate.
- Sanitise surfaces & mop floors at the end of each day where required.

- No visitors to site. Only workers involved in the project to enter any locations or work sites.

Kitchen & Catering in Pre-Production

- Stagger lunch where possible and apply physical distancing measures.
- No open snacks, fruit or shared food. Consider lunch box style lunches to be prepared. Where appropriate, consider a subsidy for workers who are required to bring own lunch.
- No food around equipment or work areas
- All communal cutlery & crockery must be sterilised in dishwasher.
- Communal kitchen items to be sanitised before & after use.
- Compostable cutlery & crockery to be used if sterilisation is not possible.

Drinks & Craft Services While on Set

- No food on set
- Drinks on set only with permission by the location manager
- No-double handling of food and drinks, i.e. grabbing a coffee for your sound department colleague, etc. All crew to get their own in the designated unit pickup areas.

Interaction with Other Departments, Suppliers, Cast & Extras

Gear Prep

- All suppliers should have their own policy and plan for dealing with the COVID-19 pandemic including contact tracing and the cleaning/sanitising of all equipment. Please notify production if you have concerns.
- Rental houses should have the gear in a prep bay cleaned and ready for pickup or testing, as well as adequate procedures for handling equipment handovers.
- Rental houses should have equipment and hand sanitiser readily available.
- Rental houses should have strict contact tracing procedures in place, i.e. a sign in/out system in place, etc.
- All equipment hand-overs should be contactless.
- Consider working with the Costume department to pre-rig microphones in optimum positions in costumes to avoid microphone being affixed to actor, or requiring further adjustment when artist is in costume. This may require costume decisions to be taken earlier and may need testing during pre-production. Consider shooting costume camera tests with sound.
- Sound department to consult with VFX supervisor to investigate if microphones can be mounted external to costumes and digitally removed.

Meetings

- Sound or inter-departmental meetings to be remote or on digital platforms as far as practicable. Or hold meetings in open areas wherever possible.
- PPE should be available for essential inter-departmental meetings.
- Physical distancing to be maintained on essential inter-departmental meetings and work (i.e. wardrobe fittings, pre-production meetings, tech recces, etc.). Use of a face covering is strongly recommended.
- Reduce physical interaction with other departments as far as reasonably practicable.
- Interactions with other crew, cast and public must be as per physical distancing protocols.

Travel

- Ride-sharing is not recommended unless you are already in a small and regular work bubble and if physical distancing is maintained. Use of a face covering is strongly recommended.
- No recycling air, clean air fan inlet only, open windows where possible.
- Crew who travel together should always be part of the same work bubble.
- A passenger log must be kept for shared vehicles.
- Shared vehicles should not be used outside work

Set Protocol

- Sets should be treated as closed sets, with essential crew on set only.
- A 1 meter distance to cast and other crew (DOP, camera team, etc.) must be adhered to.
- To avoid on-set congestions, liaise with 1st AD for appropriate times to fit/adjust radio mics, etc.
- The Sound Mixer does not need to be on set but could be provided with suitable isolated area. On location this may be a separate room.
- For any sequences in moving vehicles sound mixer should be in separate vehicle.

- Discuss supplying a separate small speaker set up for use by the Director or 1st AD to communicate with the cast or off-set crew using separate microphones.
- Whenever practicable, only the camera department will plug cables and equipment into the camera. Please liaise with them to ensure contactless work.
- Allow other departments time and space to complete their work.
- For enclosed shooting sets, please ensure regular aeration, open windows when possible. It is recommended that crew are allowed time during the day to get fresh air.
- A designated radio mic fitting area (possibly with workspace for equipment sanitation) may be required away from set or the costume fitting area. Please discuss with production/locations/costume departments.

Equipment & Kit

- All kit must be cleaned/sanitised between locations and at the end of each day.
- All radio mics must be cleaned between cast and at the end of each day.
- It is advisable that radio mics are designated to specific cast members whenever possible.
- Headphones should be designated individual crew members and sanitised at the end of each day.
- Avoid double handling of consumables like batteries. Consumables should be sanitised before handling. Consider assigning multiple transmitters to cast to avoid battery changes.
- Hands to be washed/sanitised regularly
- Consider a tag system for identifying cleaned equipment to save time.
- Everything should live cleaned in a case. Assume cases/handles are always exposed and require hand washing after handling.
- It is recommended that, whenever practicable, cast (or a crew member already in the cast's Close Proximity Bubble, i.e. their Make Up Artist or Costume Standby) fit their own radio mics. When this is not possible, a Close Proximity Bubble should be considered and discussed with Production. See below section.

Sound Cards & Rushes Procedures

- Sound cards should be handed over in transit cases that are sanitised before handover and Cards should be sanitised before return.
- Appropriate Rushes Drives handling procedure to be developed by each production/ post-production to ensure safety of anyone handling cards and of the rushes themselves.
- Production should consider sending a single Rushes Drive with all data rather than sending multiple camera cards and a sound card to post.

Cast

- COVID-19 information to be distributed to cast prior to their arrival on set.
- All cast must fill in a COVID-19 Health Declaration prior to work.
- Consider number of cast and their health (elderly, etc.) and the ability for physical distancing both on and off-set before commencing production.
- Face masks/coverings and PPE shall be made available to all cast.
- Cast may be asked to use a face covering whenever practicable. Some productions may require this as part of their H&S plan.
- All cast to wash/sanitise hands on arrival at location/studio.
- A COVID-19 induction and health check on arrival by a competent person, i.e., registered nurse, paramedic or the safety officer.
- Whenever possible, to avoid the need for Close Proximity Bubbles, cast should undertake any task they can perform themselves, including the fitting of radio mics.

Close Proximity Bubbles

Close proximity tasks (0-1metre) introduces a higher risk and PCBU's must eliminate or minimize this increased risk by applying the appropriate control measures.

- Close contact scenes with less than a metre physical distance (a Close Proximity Environment) must only be done after thorough discussion and mutual agreements with producer, Cast/Agent and other affected departments (H&S, Make Up, etc.).
- *Specific guidance around intimacy scenes (kissing, etc.) is yet to come. If required, please contact ScreenSafe or WorkSafe for advice.*
- For some productions longer-term Close Proximity Bubbles might be created to avoid contact with other bubbles (i.e. key Cast, their Make Up Artist, Costume Standby and/or PA/Driver).

- Communication must be clear about who is in the Close Proximity Bubble.
- The Close Proximity Bubble size must be kept to minimum, ideally less than 3. No more than 10 people.
- Time spent in Close Proximity should be limited to the absolute minimum necessary time.
- While in a Close Proximity Bubble, contact with other bubbles should be kept to an absolute minimum. The crew member should also consider the extent and impact this may have on their family and social life.
- Cast's individual comfort levels must be taken into account and there must be no coercion. Consent must be gained for each and every scene of an intimate/close nature. Cast must never be required to perform intimate or close action they are not comfortable with.
- The emphasis is on transparency and communication. Performers will get scripts and information regarding the intimate/close scenes well in advance of rehearsals and shooting. They need to know the level of intimacy/physical action required in detail and the length of time expected to be in close/intimate proximity.
- Cast will be given adequate time to consult privately with their agent prior to agreeing to the scene. Nothing should be last minute.
- Close Environment scene details shall be re-confirmed prior to blocking/filming and Cast and crew comfort levels re-assessed.
- Crew working in a Close Proximity Bubble should wear appropriate PPE if requested or recommended.
- Use of a face covering is strongly recommended.
- If you choose to wear PPE, the type is up to you and should be based on the level of risk for your business or service, the working proximity, the physical work area, and the length of time people are together.
- Work should only be completed within one metre if it can't otherwise be achieved. The time spent in Close Proximity needs to be kept to a minimum. At all other times, a one meter distance should be maintained.
- *Please familiarise yourself with the Close Proximity and Scene Specific Guidance sections of the ScreenSafe Covid-19 Protocols.*

Scheduling

- Please consult with AD's to ensure that the shoot schedule reflects the appropriate time required to facilitate required physical distancing and sanitising guidelines. Particularly in regards to Close Proximity Bubble requirements.
- Ensure the shoot schedule reflects fatigue levels and the wellness of crew.
- Consider staggered calls and rolling lunches to maintain appropriate physical distancing.
