# COVID-19 Traffic Light System

## - For Productions Using Vaccination Passports

The below guidelines apply to productions that use the vaccination passport system. All persons entering a worksite must have a current and valid vaccination passport.

To operate safely at all Traffic Light levels during the COVID-19 pandemic, all PCBUs, including contractors and sole traders, must comply with:

- settings for the current Traffic Light level (including public health measures), **and**
- public health requirements for their workplace (e.g. physical distancing), **and**
- all other health and safety obligations, **and**
- the Screen Sector Health and Safety Standard and Protocols, and **must**
- create and implement a COVID-19 safety plan identifying how a PCBU will 'operate safely' within the WorkSafe COVID-19 framework.

At all Traffic Light levels, PCBUs will need to follow all public health guidelines. These include the following, although guidelines and requirements may change over time:

- Making sure the production is implementing screen industry best practice protocols and has appropriate COVID-19 safety protocols and a designated COVID Officer in place.
- Regular disinfecting of surfaces.
- Encouraging good hand hygiene by allowing frequent hand washing and sanitising.
- Not having sick people in the workplace (use of the COVID-19 Health Declaration form is highly recommended).
- Meeting physical distancing requirements.
- Government recommendations and mandates in regards to use of face coverings.
- Keeping an eye on the mental health of cast, crew and suppliers (please make yourself familiar with support mechanisms available for anyone that might be struggling financially or mentally).

The aim of the screen industry specific guidance is to assist PCBUs to meet their workplace health and safety obligations while operating under the COVID-19 Traffic Light System. This information will be updated from time to time.

### **Medical Exemptions**

Anyone with an official COVID-19 exemption will be able to get a vaccination passport.

We recommend that anyone with a vaccination exemption disclose this to the production's H&S team in case their underlying condition puts them or others at risk for certain work on that production.

	RED	ORANGE	GREEN
<b>NZ COVID-19 Level Outcome</b>	At Red, action will be needed to be taken to protect both at-risk people and protect our health system from an unsustainable number of hospitalisations.	At Orange, there will be increasing community transmission that is putting pressure on our health system. The whole of the health system will focus its resources, but can continue to manage primary care, public health, and hospitals. There may also be an increasing risk for at-risk people.	Green is when there are some COVID-19 cases in the community, and sporadic imported cases. Community transmission will be limited and COVID-19 hospitalisations will be at a manageable level. The health system will be ready to respond, including primary care, public health, and hospitals.
	Filming in highly controlled workplaces with a minimum 1m physical distancing.  Consider limiting cast and crew on set.	Work can be done on film and television sets.  1m physical distancing is recommended whenever possible, unless performing an approved Close Proximity task.	No restrictions on film or television productions.
<b>Screen Industry Summary</b>	Work can be done on film and television sets, but with a minimum 1m physical distancing, and strict protocols in place for any Close Proximity work.  Contactless interactions with the general public.  Face coverings are strongly recommended. And it would be expected that most productions will require them as part of their H&S plan.  Use of the COVID-19 Health Declaration form is highly recommended for anyone entering a work site.  Any person entering a work site MUST have a valid vaccination passport.  Travel between regions is allowed.  Ability for all cast and crew to raise concerns of action, physical distancing or risks.	Business continuity plans activated.  Implementation of physical distancing measures within the workplace.  Contact tracing measures in place.  Travel between regions is allowed.  Contactless interactions with the general public.  Face coverings are strongly recommended. And it would be expected that most productions will require them as part of their H&S plan.  Use of the COVID-19 Health Declaration form is highly recommended for anyone entering a work site.  Any person entering a work site MUST have a valid vaccination passport.  Ability for all cast and crew to raise concerns of action, physical distancing or risks.	Cleaning protocols actioned.  Contact tracing measures in place.  Travel between regions is allowed.  Production and site specific COVID-19 Safety Plan approved and implemented.  Use of the COVID-19 Health Declaration form is highly recommended for anyone entering a work site.  Any person entering a work site MUST have a valid vaccination passport.  Ability for all cast and crew to raise concerns of action, physical distancing or risks.

	<b>RED</b>	<b>ORANGE</b>	<b>GREEN</b>
<b>Expected productions</b>	<p>All scale productions, provided they can work within restrictions in regards to minimum 1m physical distancing requirements and strict guidelines in regards to Close Proximity work.</p> <p>Additional tools, like surveillance testing should be strongly considered.</p> <p>Closed or controlled workplaces where there is no contact with the public.</p> <p>Close Proximity work can be done with strict Close Proximity Guidelines in place.</p> <p>Low risk activities only. No high risk stunts, SPFXs or locations that could put additional pressure on hospitals.</p> <p>Pre-production where crew have the ability to work in small workgroups and are able to maintain the required physical distancing.</p> <p>Crew members must work from home if they are able.</p>	<p>All scale productions, provided they can work within restrictions in regards to physical distancing (a recommended 1m) and Close Proximity work with appropriate controls in place.</p> <p>Additional tools, like surveillance testing should be considered.</p> <p>Productions prepared to escalate to RED at any time. This may happen rapidly.</p> <p>Pre-production where crew have the ability to work in small workgroups and are able to maintain the recommended 1m physical distancing.</p> <p>Crew members should consider working from home if they are able to.</p>	<p>No restrictions on production.</p>
<b>Content</b>	<p>Close Proximity work is permitted, but steps must be taken to ensure a safe workplace. Cast and crew comfort levels must be taken into consideration and strict controls (PPE, etc.) implemented. Please refer to the Close Proximity Bubble section of the Protocols.</p> <p>Avoid high risk activities that can put additional pressure on the health system.</p>	<p>Close Proximity work is permitted, but steps must be taken to ensure a safe workplace. Cast and crew comfort levels must be taken into consideration and suggested controls (PPE, etc.) implemented. Please refer to the Close Proximity Bubble section of the Protocols.</p>	<p>No restrictions.</p>

	RED	ORANGE	GREEN
Crew	<p>Strict adherence to on-set production bubbles.</p> <p>Only crew who are critical to production to be involved with the physical shoot.</p> <p>Crew to work from home where possible.</p> <p>Engaging crew may be difficult due to their personal situation. I.e. caring for someone at home, at risk population in their bubble at home or childcare.</p> <p>Day players, casuals and extras need stringent screening. They could have potentially been to multiple other worksites and can lead to a large amount of contacts, increasing the risk of transmission within the production. Additional risk minimisation protocols must be put in place.</p> <p>Crew to complete health declaration forms before coming to the worksite.</p>	<p>1m physical distancing is recommended, unless performing a necessary and approved Close Proximity task.</p> <p>Production should facilitate crew working from home if appropriate.</p> <p>Undertake health screening for crew prior to them starting work.</p> <p>Identify at risk crew.</p> <p>Engaging crew may be difficult due to their personal situation. I.e. caring for someone at home or at risk population in their bubble at home or childcare.</p> <p>Crew to complete health declaration forms before coming to the worksite.</p>	<p>No restrictions provided all workers have a valid and current vaccination passport.</p> <p>Structures in place for cast and crew to be able to raise concerns regarding COVID-19 in the workplace.</p> <p>Consideration must be given to crew members' personal situation. i.e. caring for someone at home, at risk population in their bubble at home.</p> <p>Crew to complete health declaration forms before coming to the worksite.</p>

	RED	ORANGE	GREEN
<p><b>Close Proximity Environments</b></p> <ul style="list-style-type: none"> <li>• <b>Make-up &amp; Hair</b></li> <li>• <b>Costume</b></li> <li>• <b>Sound</b></li> </ul>	<p>Close Proximity work can be undertaken with strict PPE &amp; hygiene measures in place. Please refer to the Close Proximity guidelines.</p> <p>Surveillance testing should be strongly considered.</p> <p>Procedures in place identifying how equipment must be cleaned and sanitised before and after use.</p> <p>Strict work bubbles with structures in place to ensure the contact tracing of all crew.</p> <p>Suppliers providing public services that require close personal contact (e.g. hairdressers, manicurists, beauticians, domestic cleaners, personal trainers, gymnasiums) can operate provided they are using vaccination passports and have appropriate health measures in place.</p> <p>Make sure adequate ventilation is in place and that time spent in Close Proximity is kept to a minimum.</p> <p>Face coverings are strongly recommended. And it would be expected that most productions will require them as part of their H&amp;S plan.</p>	<p>Close Proximity work can be undertaken with appropriate and agreed PPE &amp; hygiene measures in place.</p> <p>Crew to maintain the recommended 1m physical distancing between each workstation. Consider movement of crew around workstations and maintaining a recommended 1 metre from each other.</p> <p>Design and assemble work bubbles to provide continuity within a team in case a crew member becomes unwell.</p> <p>Suppliers providing public services that require close personal contact (e.g. hairdressers, manicurists, beauticians, domestic cleaners, personal trainers, gymnasiums) can operate provided they are using vaccination passports and have appropriate health measures in place.</p> <p>Make sure adequate ventilation is in place and that time spent in Close Proximity is kept to a minimum.</p> <p>Face coverings are strongly recommended. And it would be expected that most productions will require them as part of their H&amp;S plan.</p>	<p>No restrictions.</p> <p>Vigorous hygiene standards to be maintained.</p> <p>Crew may be asked to wear PPE.</p> <p>Contact tracing is a government requirement.</p> <p>Health screening questionnaire to take place prior to starting work.</p>
<p><b>Equipment</b></p>	<p>Limit equipment on set if it creates unnecessary restrictions to physical distancing requirements.</p> <p>Single use products can reduce infection, but must be discarded correctly or it may increase the risk of infection.</p> <p>All equipment to be cleaned in accordance with the Ministry of Health guidance after each use. This is particularly important with shared equipment.</p>	<p>Limit equipment on set if it creates unnecessary restrictions to physical distancing requirements.</p> <p>Keep gear stashes to a minimum. Crew should keep the majority of their equipment inside workstations/ vehicles.</p> <p>Single use products can reduce infection, but must be discarded correctly or it may increase the risk of infection.</p> <p>All equipment to be cleaned in accordance with the Ministry of Health guidance after each use. This is particularly important with shared equipment.</p>	<p>Basic cleaning protocols in place.</p>

	RED	ORANGE	GREEN
<b>Food / Catering</b>	<p>Contactless service only.</p> <p>Pre-packaged food only.</p> <p>Unit/Craft Services should be “café-style”. Or individual snack packages can be prepared and handed out.</p> <p>All meals should be prepared in accordance with NZ food safety standards.</p> <p>No self-service catering set ups.</p> <p>Engineering controls in place, i.e. barriers and screens between crew and servers.</p> <p>Foot pump operated water coolers OR prepacked water in bottles - no button operated unit cooler.</p> <p>Stagger lunches and facilitate physical distancing.</p> <p>Crew should not eat on set or in communal areas, only in designated areas where appropriate physical distancing is achievable.</p> <p>Water should be available for consumption on set if appropriate to the location and if managed in accordance to physical distancing and hygiene measures.</p> <p>Crew to maintain a minimum physical distancing of 1 metres during meal breaks.</p> <p>No shared cutlery, dishes or cups.</p> <p>Hand washing, sanitiser stations available in all eating areas.</p>	<p>Contactless service is recommended.</p> <p>Pre-packaged food or a contactless buffet (catering staff serving up).</p> <p>Unit/Craft Services should be “café-style”.
