

2 June 2020

ScreenSafe COVID 19 Health and Safety Protocols - Update

Below is the updated information for the ScreenSafe COVID 19 Health and Safety Protocols for the New Zealand Screen Sector. Please note this update includes both adjustments based on feedback received to date and also updates around the changed guidelines from Government around safe practices for businesses operating under Level 2 of the COVID 19 response.

The changed or updated sections include:

Page 5: added Government PPE guidelines for Level 2

Page 14, 22: clarified PPE use under Level 2

Page 20: clarified the 100 person rule (does not apply to work sites) for Level 2

Page 25: addition to supplier and vendor requirements for Level 2

Page 27, 49, 52, 53, 54: clarify PPE requirements for Close Proximity undertakings for Level 2

Page 33-34: added in the Scene Specific Guidance addendum for Level 2

Page 49: added in link to Level 2 Department Guidelines

As before, please note this is a living document, developed to support you in minimising exposure to Covid-19 whilst working in the Screen Sector.

Please ensure you have policies and procedures in place that are specific to your production, and that actively work to manage the risk of transmission of infection within each workplace.

This guide does not remove or replace obligations under the *Health and Safety in the Workplace Act 2015*, and must accompany a robust approach to workplace Health and Safety generally.
